Akash Debnath

Senior QA Engineer | Selenium | Playwright | Java | Cucumber | RestAssured | Jenkins
akashdebnath4070@gmail.com | +91 8867394070 | LinkedIn | Kolkata (willing to relocate)

PROFESSIONAL SUMMARY

Senior QA Engineer with **8 years** in **test automation** and **manual testing**, designing **reusable automation frameworks** with **Selenium**, **Playwright** and **Cucumber** in **Java** (**OOP**, **POM**). Delivers **REST API testing** with **RestAssured** and **Postman**, **SQL** database validation, and **functional**, **regression** and **exploratory testing** from **test planning** and **test case design**. Grew **test coverage** from **13% to 65%** and owns **CI/CD** pipelines in **Jenkins**. Drives **defect management** and **troubleshooting** with **developers** and **product owners** in **Agile** teams. **ISTQB CTFL**.

PROFESSIONAL EXPERIENCE

Senior QA Engineer: Persistent Systems Pvt Ltd **Jun 2025 to Present**

- Owned **E2E test automation** for **web applications** with **Playwright** using a reusable **POM** framework and fixtures, **reducing regression testing effort** by **55%**
- Owned **test planning**, **test case design** and **test strategy** for releases, combining automation with **manual**, **functional** and **exploratory testing**, and led **code reviews** for **4 to 5** junior testers
- Performed **REST API testing** of **microservices** with **RestAssured**, driving a **38%** drop in API defects through schema, auth and error handling checks, and ran **SQL** and MongoDB **database validation** against **Kafka** events
- Integrated automation suites into **CI/CD pipelines** with **Jenkins** and **GitHub Actions**, running **cross-browser** tests and verifying service readiness after deployments
- Led **troubleshooting** of **flaky tests** via network mocking and trace analysis, and **root cause analysis** with Kibana and **AWS** CloudWatch, managing **defects** in **Jira** with developers and product owners
- Implemented **AI** in test automation with **Claude Code**, **GitHub Copilot** and **Playwright MCP** with human review, cutting script authoring time by **20%** and **improving test coverage** from **13% to 65%**

SDET: T-Systems ICT India Pvt Ltd **May 2022 to Jun 2025**

- Designed a reusable **Selenium WebDriver** framework in **Java** with **OOP** principles, TestNG and Maven, cutting manual testing effort by **40%**, and led the **Selenium to Playwright migration** with **Playwright JavaScript**, lowering browser defects by **25%**
- Streamlined Salesforce workflows with targeted **regression** and **smoke** scenarios, reducing escaped business critical defects by **30%**
- Built Java **API automation** with **RestAssured** and **Postman**, growing endpoint coverage by **50%** through positive, negative and boundary scenarios including data validation and error handling
- Connected **test automation** suites to **Jenkins** and **Docker** pipelines with **cross-browser** execution, with Shell Scripting for log parsing and faster failure analysis

Software Test Engineer: MSR IT Ltd **Oct 2020 to May 2022**

- Introduced **Cucumber BDD** with Cucumber-JVM alongside Selenium and API checks, automating **75%** of prioritized regression cases through Jenkins and **GitHub Actions**
- Parameterized Selenium tests with Excel and CSV datasets for **test data management**, reducing duplicate scripts by **35%** through shared logic and reusable validation methods
- Maintained requirement traceability in **JIRA** and **TestRail**, linking test cases, execution results and defects to clarify validation status and improve pre-release issue detection by **20%**
- Automated Android application testing with **Appium** to validate functional behavior on mobile devices

Associate Consultant: Atos Syntel **Oct 2018 to Jul 2020**

- Executed **functional** and **regression testing** for healthcare applications, reducing post release defects by **20%** through workflow validation, targeted retesting and review of recurring failure patterns
- Devised manual and automated scenarios for healthcare workflows, **collaborating with cross-functional teams** in **Agile/Scrum** refinement and planning to clarify requirements and document defects with reproducible evidence

SKILLS

- **Languages**: Java (OOP), JavaScript, TypeScript, Python (Basic), SQL
- **UI Automation**: Selenium WebDriver, Playwright, Cucumber (BDD), Page Object Model, TestNG
- **API Automation**: RestAssured, Postman, SwaggerHub, REST APIs
- **Testing**: Functional, Regression, Exploratory, Test Planning, Test Case Design, Cross-Browser, E2E
- **CI/CD and Cloud**: Jenkins, GitHub Actions, Docker, AWS, Azure DevOps, Maven
- **Defect Tracking and Tools**: Jira, TestRail, Git / GitHub, MongoDB, Kafka
- **AI in Testing**: Playwright MCP, Claude Code, GitHub Copilot, RAG
- **Methodology**: Agile / Scrum, SDLC / STLC, Code Reviews

PROJECTS

Ad Server OMS Automation | Persistent Systems **Jun 2025 to Present**

- Scripted UI and API **test automation** using **Playwright** with JavaScript and TypeScript, replacing manual regression checks across order lifecycle workflows with repeatable validation
- Reduced regression cycles by **35% to 40%** and cut post release production fixes through **risk based testing** and release gates, prioritizing business critical defects before each production release

EDUCATION

Acharya Institute of Technology **Aug 2014 to Jul 2018**

Bachelor of Engineering (B.E.) in Computer Science and Engineering

CERTIFICATIONS

- AWS Certified AI Practitioner (AIF-C01) **Sep 2026**
- Certified Tester AI Testing (CT-AI) 2.0 by ISTQB **Aug 2026**
- Amazon Web Services (AWS) Cloud Practitioner **Dec 2024**
- Certified Tester Foundation Level: Agile Tester (CTFL-AT) from ISTQB **Nov 2024**
- Microsoft Certified: Azure Fundamentals **Mar 2024**
- Certified Tester Foundation Level (CTFL) by ISTQB **Mar 2023**

ACHIEVEMENTS

- **I AM T, Count on Me Award** | T-Systems ICT India: awarded for reducing manual testing effort by **30%**
- **High Five Individual Award**: Persistent Systems; honored for **55%** faster regression cycles
- **Bravo Team Award**: Persistent Systems; cited for reducing defect escapes by **32%**
