Akash Debnath

Senior Test Engineer | Playwright UI Automation | RestAssured API Automation | Java CI/CD
akashdebnath4070@gmail.com | +91 8867394070 | LinkedIn | Kolkata (willing to relocate)

PROFESSIONAL SUMMARY

Senior Test Engineer with **8 years** in **test automation**, building **Playwright UI automation** and **RestAssured (REST Assured) API automation** with **Java**, **JavaScript** and **TypeScript**. Covers **functional**, **regression**, **smoke** and **integration testing**, plus REST API positive, negative, data validation, auth and error handling cases, decreasing API defects by **38%**. Runs suites in **CI/CD** with **Jenkins**, **GitHub Actions**, **Azure DevOps** and **Docker**, partners with developers in refinement and planning, manages test data, applies **Cucumber BDD**, and uses **AI-assisted** tools (**Claude Code**, **GitHub Copilot**) with critical human review. Cloud concepts on **AWS**. **ISTQB CTFL**.

PROFESSIONAL EXPERIENCE

Senior Test Engineer: Persistent Systems Pvt Ltd **Jun 2025 to Present**

- Engineered **Playwright** UI **test automation** frameworks in JavaScript and TypeScript, accelerating **regression** execution by **55%** through reusable components, parallel runs and removal of redundant scenarios
- Verified REST APIs with **RestAssured** and SwaggerHub, driving a **38%** drop in API defects through schema validation, positive and negative cases, data checks, auth flows and error handling coverage
- Reconciled **SQL** and MongoDB records with **Kafka** events, tracing message flows across modules to find data inconsistencies during **integration testing**
- Configured **Jenkins CI/CD** pipelines and confirmed service readiness after deployments, guiding **4 to 5** junior testers on QA processes and workflows
- Diagnosed failures with Elasticsearch, Kibana, **AWS** CloudWatch and New Relic, tracing failure paths and documenting evidence in **Jira** for **root cause analysis** and defect reporting
- Applied **AI-assisted** tools **Claude Code** and **GitHub Copilot** with critical human review, cutting script authoring time by **20%** and raising automation coverage from **13% to 65%**

SDET: T-Systems ICT India Pvt Ltd **May 2022 to Jun 2025**

- Reworked **Selenium WebDriver** with **Java**, TestNG and Maven using reusable utilities, cutting manual testing effort by **40%**, and led the **Selenium to Playwright migration**, lowering browser defects by **25%**
- Streamlined Salesforce workflows with targeted **regression** and **smoke** scenarios, reducing escaped business critical defects by **30%** through validation of business rules, permissions and dependent application behavior
- Built Java **API automation** with **RestAssured** and Postman checks, growing endpoint coverage by **50%** through positive, negative and boundary scenarios including data validation and error handling
- Connected **test automation** suites to **Jenkins** and **Docker** pipelines for containerized test environments, standardizing execution and publishing results, with Shell Scripting for log parsing and faster failure analysis

Software Test Engineer: MSR IT Ltd **Oct 2020 to May 2022**

- Introduced **Cucumber BDD** with Cucumber-JVM feature files, step definitions and runners alongside Selenium and API checks, automating **75%** of prioritized regression cases through Jenkins and **GitHub Actions** pipeline integration
- Parameterized Selenium tests with Excel and CSV datasets for **test data management**, reducing duplicate scripts by **35%** through shared logic and reusable validation methods
- Maintained requirement traceability in **JIRA** and **TestRail**, linking test cases, execution results and defects to clarify validation status and improve pre-release issue detection by **20%**
- Automated Android application testing with **Appium** to validate functional behavior and application flows on mobile devices

Associate Consultant: Atos Syntel **Oct 2018 to Jul 2020**

- Executed **functional** and **regression testing** for healthcare applications, reducing post release defects by **20%** through workflow validation, targeted retesting and review of recurring failure patterns
- Devised manual and automated scenarios for healthcare workflows, collaborating with **Agile** teams in refinement and planning to clarify requirements, validate expected behavior and document defects with reproducible evidence

SKILLS

- **Languages**: Java, JavaScript, TypeScript, SQL, Shell Scripting
- **UI Automation**: Playwright, Selenium WebDriver, TestNG, JUnit, Cucumber (BDD)
- **API Automation**: RestAssured, Postman, SwaggerHub, REST APIs
- **Testing**: Functional, Regression, Smoke, Integration, Test Automation, Defect Reporting
- **CI/CD and Cloud**: Jenkins, GitHub Actions, Azure DevOps, Docker, AWS, Maven
- **Data and Tools**: SQL, MongoDB, Kafka, Test Data Management, Jira, Git / GitHub, TestRail
- **Observability**: Elasticsearch, Kibana, AWS CloudWatch, New Relic, Root Cause Analysis
- **Methodology and AI**: Agile / Scrum, BDD, Refinement and Planning, Claude Code, GitHub Copilot

PROJECTS

Ad Server OMS Automation | Persistent Systems **Jun 2025 to Present**

- Scripted UI and API **test automation** using **Playwright** with JavaScript and TypeScript, replacing manual regression checks across order lifecycle workflows with repeatable validation
- Reduced regression cycles by **35% to 40%** and cut post release production fixes through **risk based testing** and release gates, prioritizing critical defects before each production release

EDUCATION

Acharya Institute of Technology **Aug 2014 to Jul 2018**

Bachelor of Engineering in Computer Science and Engineering

CERTIFICATIONS

- AWS Certified AI Practitioner (AIF-C01) **Sep 2026**
- Certified Tester AI Testing (CT-AI) 2.0 by ISTQB **Aug 2026**
- Amazon Web Services (AWS) Cloud Practitioner **Dec 2024**
- Certified Tester Foundation Level: Agile Tester (CTFL-AT) from ISTQB **Nov 2024**
- Microsoft Certified: Azure Fundamentals **Mar 2024**
- Certified Tester Foundation Level (CTFL) by ISTQB **Mar 2023**

ACHIEVEMENTS

- **I AM T, Count on Me Award** | T-Systems ICT India: awarded for reducing manual testing effort by **30%**
- **High Five Individual Award**: Persistent Systems; honored for **55%** faster regression cycles
- **Bravo Team Award**: Persistent Systems; cited for reducing defect escapes by **32%**
