Akash Debnath

QA Automation Engineer | Playwright | TypeScript | Selenium | API and UI Testing | CI/CD | AI Testing
akashdebnath4070@gmail.com | +91 8867394070 | LinkedIn | Kolkata (willing to relocate)

PROFESSIONAL SUMMARY

QA Automation Engineer with **8 years** in **test automation**, specializing in **Playwright** with **TypeScript** for **UI and API testing**. Builds frameworks with **Page Object Model (POM)** and **BDD** (**Cucumber**), plus **Selenium** and **RestAssured**. Delivers **functional**, **regression** and **cross-browser testing**, **improving test coverage** from **13% to 65%**, with **CI/CD** in **Jenkins** and **GitHub Actions**. Hands-on **AI** with **MCP**, **Claude Code** and **GitHub Copilot**. **ISTQB CTFL**.

PROFESSIONAL EXPERIENCE

QA Automation Engineer: Persistent Systems Pvt Ltd **Jun 2025 to Present**

- Designed and maintained **automation frameworks** with **Playwright** in **TypeScript** using **Page Object Model (POM)** and fixtures, **reducing regression testing effort** by **55%** through reusable components and parallel runs
- Owned **test case design** and test planning for web and API releases, leading **code reviews** and **testing best practices** for **4 to 5** junior testers
- Performed **API testing** of microservices with **RestAssured** and SwaggerHub, driving a **38%** drop in API defects through schema validation, positive and negative cases, auth flows and error handling
- Integrated **Playwright** suites into **CI/CD** with **Jenkins** and **GitHub Actions**, running **cross-browser** tests and verifying service readiness after deployments
- Reconciled **SQL** and MongoDB records with **Kafka** events in **integration testing**
- Reduced **flaky tests** through network mocking and trace analysis, and drove **root cause analysis** with Elasticsearch, Kibana and **AWS** CloudWatch, tracking defects in **Jira**
- Implemented **AI** in test automation with **Claude Code**, **GitHub Copilot** and **Playwright MCP** with human review, cutting script authoring time by **20%** and **improving test coverage** from **13% to 65%**

SDET: T-Systems ICT India Pvt Ltd **May 2022 to Jun 2025**

- Reworked **Selenium WebDriver** with **Java**, TestNG and Maven using reusable utilities, cutting manual testing effort by **40%**, and led the **Selenium to Playwright migration** with **Playwright JavaScript**, lowering browser defects by **25%**
- Streamlined Salesforce workflows with targeted **regression** and **smoke** scenarios, reducing escaped business critical defects by **30%**
- Built Java **API automation** with **RestAssured** and Postman checks, growing endpoint coverage by **50%** through positive, negative and boundary scenarios including data validation and error handling
- Connected **test automation** suites to **Jenkins** and **Docker** pipelines with **cross-browser** execution, with Shell Scripting for log parsing and faster failure analysis

Software Test Engineer: MSR IT Ltd **Oct 2020 to May 2022**

- Introduced **Cucumber BDD** with Cucumber-JVM alongside Selenium and API checks, automating **75%** of prioritized regression cases through Jenkins and **GitHub Actions**
- Parameterized Selenium tests with Excel and CSV datasets for **test data management**, reducing duplicate scripts by **35%** through shared logic and reusable validation methods
- Maintained requirement traceability in **JIRA** and **TestRail**, linking test cases, execution results and defects to clarify validation status and improve pre-release issue detection by **20%**
- Automated Android application testing with **Appium** to validate functional behavior on mobile devices

Associate Consultant: Atos Syntel **Oct 2018 to Jul 2020**

- Executed **functional** and **regression testing** for healthcare applications, reducing post release defects by **20%** through workflow validation, targeted retesting and review of recurring failure patterns
- Devised manual and automated scenarios for healthcare workflows, **collaborating with cross-functional teams** in **Agile/Scrum** refinement and planning to clarify requirements and document defects with reproducible evidence

SKILLS

- **Languages**: TypeScript, JavaScript, Java, Python (Basic), SQL
- **UI Automation**: Playwright, Selenium WebDriver, Page Object Model, Cucumber (BDD), TestNG
- **API Automation**: RestAssured, Postman, SwaggerHub, REST APIs
- **Testing**: Functional, Regression, Cross-Browser, API and UI, Test Case Design
- **CI/CD and Cloud**: Jenkins, GitHub Actions, Docker, AWS, Azure DevOps, Maven
- **Defect Tracking and Tools**: Jira, TestRail, Git / GitHub, MongoDB, Kafka
- **AI in Testing**: Playwright MCP, Claude Code, GitHub Copilot, RAG
- **Methodology**: Agile / Scrum, SDLC / STLC, Code Reviews

PROJECTS

Ad Server OMS Automation | Persistent Systems **Jun 2025 to Present**

- Scripted UI and API **test automation** using **Playwright** with JavaScript and TypeScript, replacing manual regression checks across order lifecycle workflows with repeatable validation
- Reduced regression cycles by **35% to 40%** and cut post release production fixes through **risk based testing** and release gates, prioritizing critical defects before each production release

EDUCATION

Acharya Institute of Technology **Aug 2014 to Jul 2018**

Bachelor of Engineering (B.E.) in Computer Science and Engineering

CERTIFICATIONS

- AWS Certified AI Practitioner (AIF-C01) **Sep 2026**
- Certified Tester AI Testing (CT-AI) 2.0 by ISTQB **Aug 2026**
- Amazon Web Services (AWS) Cloud Practitioner **Dec 2024**
- Certified Tester Foundation Level: Agile Tester (CTFL-AT) from ISTQB **Nov 2024**
- Microsoft Certified: Azure Fundamentals **Mar 2024**
- Certified Tester Foundation Level (CTFL) by ISTQB **Mar 2023**

ACHIEVEMENTS

- **I AM T, Count on Me Award** | T-Systems ICT India: awarded for reducing manual testing effort by **30%**
- **High Five Individual Award**: Persistent Systems; honored for **55%** faster regression cycles
- **Bravo Team Award**: Persistent Systems; cited for reducing defect escapes by **32%**
